

RUSTAM FAKHRUTDINOV

Security Engineer • Application Security • Offensive & DevSecOps

OSCP+ • OSCP • CRTP • BSCP • eWPTXv2 • CRTA • MCRTA

Prague, Czech Republic • rustamsecops@gmail.com • [LinkedIn](#) • [Portfolio](#) • [Bugcrowd](#)

PROFESSIONAL SUMMARY

Security Engineer with **6+ years** across application security, offensive testing, and DevSecOps. I run black-, grey-, and white-box assessments of web apps, APIs, and cloud, wire **SAST/DAST** into CI/CD pipelines, and work hand-in-hand with developers to fix issues at the source and retest to closure. Reported **500+** vulnerabilities across enterprise engagements and public bug bounty, with reporting aligned to OWASP, NIST, and CVSS v3.1. I lean on **AI-driven automation** — custom prompts, skills, and MCP workflows — to accelerate recon, triage, and reporting, always with manual verification. Fluent in threat modeling (STRIDE), secure code review, and mentoring junior engineers.

CORE SKILLS

- Web & API pentesting (OWASP Top 10, ASVS, WSTG)
- Auth bypass, IDOR, SSRF, business logic, injection
- Cloud security — AWS & Azure (IAM, misconfig)
- Active Directory attack paths & privilege escalation
- SSRF, XXE, deserialization, RCE, SQL/NoSQL injection
- SQL / NoSQL / Snowflake
- Bash / PowerShell scripting
- Java / .NET / JavaScript (code review)
- Burp Suite Pro, Caido, SonarQube, OWASP ZAP
- AI-assisted testing: prompt / skills writing, MCP
- MITRE ATT&CK • PTES • NIST SP 800-115
- SAST / DAST / SCA in CI/CD
- Secure code review & whitebox testing
- Threat modeling (STRIDE) & architecture review
- SSO, OAuth 2.0 / OIDC, SAML, JWT
- CVSS v3.1 scoring & risk prioritization
- Regex, Tunneling & Proxying
- Python security automation
- SIEM (QRadar) & incident response
- Windows / Linux admin & VMware
- Vibe-coding & rapid tooling in Python
- SOX compliance & security auditing

PROFESSIONAL EXPERIENCE

Accenture — Penetration Tester

Nov 2023 – Present • Prague, CZ

SCOPE Web • REST/GraphQL APIs • AWS/Azure • 3rd-party & AI products • FinTech, Telecom, SaaS/IaaS

- Black/grey-box testing across **30+** major international companies (BigTech, FinTech, telecom, SaaS/IaaS, third-party and AI products), averaging **~10** new findings per engagement.
- Reported **500+** vulnerabilities to date; findings mapped to OWASP Top 10, ASVS, WSTG and scored with CVSS v3.1 for both engineering and non-technical stakeholders.
- Owned architecture review and threat modeling, then tracked remediation and retested fixes against SLAs to formal closure.
- Set up and configured DAST tooling and prepared testing environments; ran the full engagement lifecycle from scoping to reporting.
- Partnered with Security Champions across client teams; mentored juniors, delivered training on new techniques, and shared discovered vulnerability patterns.
- Integrated **AI-assisted workflows** into recon, triage, and reporting, with manual re-verification of every result.

EPAM Systems — Security Testing Engineer

Dec 2021 – Nov 2023 • Bishkek, KG

SCOPE Web & API • Full infrastructure • SDLC/CI-CD • SAST/DAST/SCA • STRIDE

- Whitebox/greybox testing of **50+** products; ran vulnerability assessments across full web, API, and infrastructure attack surface.
- Integrated **SAST, DAST, and SCA** into CI/CD pipelines and SDLC tooling, adding automated security gates that cut vulnerability exposure earlier in the lifecycle.
- Led threat modeling with STRIDE against architecture diagrams; built security checklists and performed root-cause analysis on findings.
- Drove the full vulnerability lifecycle to closure alongside developers — from discovery through fix — and prepared testing environments for each product.
- Ran OSINT and dark-web monitoring to surface information leaks; worked with Security Champions and mentored junior engineers, sharing new vulnerability classes.

Beeline Kyrgyzstan — Lead Information Security Engineer

Mar 2020 – Dec 2021 • Bishkek, KG

SCOPE SIEM (QRadar) • Network/OS/DB • SOX compliance • Incident response

- Held a key security role: monitored and investigated alerts within SLAs using SIEM, and built and onboarded new log sources end-to-end.
- Resolved **5+** real security incidents through full investigation, remediation, and system hardening, with root-cause analysis and reporting to non-IT stakeholders.

- Ran SOX compliance audits and internal penetration tests across network, OS, and database environments.
- Worked with developers and administrators to remediate vulnerabilities and misconfigurations; delivered security awareness training.

USAID Project in Kyrgyzstan — **Medical Information System Specialist** *Feb 2017 – Jan 2020 · Bishkek, KG*
 SCOPE VMware ESXi · Medical Information Systems · Infrastructure · Nationwide rollout

- Deployed Medical Information Systems across **25+** regional hospitals and **30+** patient service points, including digitization of medical records.
- Administered and maintained VMware ESXi servers and IT infrastructure; managed equipment procurement budgets.
- Assessed weaknesses in information systems and hardened them; trained staff and provided ongoing support in close collaboration with developers and medical teams.

World Health Organization — **Information Technology Expert** *May 2017 – Nov 2018 · Bishkek, KG*
 SCOPE E-Health strategy · National situational analysis · Government advisory

- Authored the technical component of the national E-Health program for the Kyrgyzstan Healthcare Strategy through 2030.
- Ran a deep analysis of gaps and weaknesses in health-sector IT and advised the government as an IT expert on digital health direction.

Kyrgyz Investment & Credit Bank — **System Administrator** *Jun 2013 – Feb 2017 · Bishkek, KG*
 SCOPE Unix/Windows · 50+ VMs · Oracle/MySQL/Postgres/Redis · Veeam · Firewalls

- Administered **50+** Unix/Windows VMs and Oracle, MySQL, PostgreSQL, and Redis databases in a regulated banking environment.
- Supported **800+** employees; managed firewalls and routing, and ran Veeam Backup & Recovery.
- Provisioned VMs and configured environments for developers; handled information security and infrastructure operations.
