

RUSTAM FAKHRUTDINOV

Security Engineer • Application Security • Offensive & DevSecOps

OSCP+ • OSCP • CRTP • BSCP • eWPTXv2 • CRTA • MCRTA

Prague, Czech Republic • rustamsecops@gmail.com • [LinkedIn](#) • [Portfolio](#) • [Bugcrowd](#)

PROFESSIONAL SUMMARY

Security Engineer with **6+ years** across application security, offensive testing, and DevSecOps. I run black, grey, and white box assessments of web apps, APIs, and cloud, integrate **SAST/DAST** into CI/CD pipelines, and work with developers to fix issues at the source and retest to closure. Reported **500+** vulnerabilities across enterprise engagements and public bug bounty, aligned to OWASP, NIST, and CVSS v3.1. I use **AI-driven automation** (custom prompts, skills, MCP workflows) to speed up recon, triage, and reporting, always with manual verification. Strong in threat modeling (STRIDE), secure code review, and mentoring.

CORE SKILLS

- | | | |
|--|--|---|
| ▪ Web & API pentesting (OWASP, ASVS, WSTG) | ▪ SAST / DAST / SCA in CI/CD | ▪ Threat modeling (STRIDE) & arch review |
| ▪ Auth bypass, IDOR, SSRF, business logic | ▪ Secure code review & whitebox testing | ▪ CVSS v3.1 scoring & risk prioritization |
| ▪ Injection: SQLi, NoSQL, XXE, RCE | ▪ Cloud security: AWS & Azure (IAM) | ▪ SSO, OAuth 2.0 / OIDC, SAML, JWT |
| ▪ Active Directory attack paths & priv-esc | ▪ SQL / NoSQL / Snowflake | ▪ Regex · Tunneling & Proxying |
| ▪ Bash / PowerShell · Python automation | ▪ Java / .NET / JavaScript (code review) | ▪ SIEM (QRadar) & incident response |
| ▪ Burp Suite Pro, Caido, SonarQube, ZAP | ▪ AI testing: prompt/skills writing, MCP | ▪ Vibe-coding & rapid tooling in Python |
| ▪ MITRE ATT&CK · PTES · NIST 800-115 | ▪ Windows / Linux admin & VMware | ▪ SOX compliance & security auditing |

PROFESSIONAL EXPERIENCE

Accenture **Penetration Tester**

Nov 2023 – Present · Prague, CZ

- Black/grey-box testing across **30+** international companies (BigTech, FinTech, telecom, SaaS/laaS, third-party and AI products) on web, REST/GraphQL APIs, and AWS/Azure, averaging **~10** findings per engagement; **500+** vulnerabilities reported to date, scored with CVSS v3.1 and mapped to OWASP Top 10, ASVS, and WSTG.
- Own architecture review and threat modeling, set up DAST tooling and test environments, track remediation and retest to closure, partner with Security Champions, mentor juniors, and integrate **AI-assisted workflows** into recon, triage, and reporting with manual verification.

EPAM Systems **Security Testing Engineer**

Dec 2021 – Nov 2023 · Bishkek, KG

- Whitebox/greybox testing of **50+** products plus full-infrastructure and web/API vulnerability assessments; integrated **SAST, DAST, and SCA** into CI/CD pipelines and SDLC tooling with automated security gates.
- Led STRIDE threat modeling on architecture diagrams, built checklists and root-cause analysis, drove the full vulnerability lifecycle to fix with developers, ran OSINT and dark-web monitoring for information leaks, and mentored juniors alongside Security Champions.

Beeline Kyrgyzstan **Lead Information Security Engineer**

Mar 2020 – Dec 2021 · Bishkek, KG

- Key security role: monitored and investigated SIEM (QRadar) alerts within SLAs, built and onboarded new log sources end-to-end, and resolved **5+** real incidents through full investigation, remediation, and hardening with root-cause analysis reported to non-IT stakeholders.
- Ran SOX compliance audits and internal penetration tests across network, OS, and database environments; remediated vulnerabilities and misconfigurations with developers and administrators, and delivered security awareness training.

USAID Project in Kyrgyzstan **Medical Information System Specialist**

Feb 2017 – Jan 2020 · Bishkek, KG

- Deployed Medical Information Systems across **25+** regional hospitals and **30+** patient service points; administered VMware ESXi and infrastructure, managed procurement budgets, hardened information systems, and trained staff in close collaboration with developers and medical teams.

World Health Organization **IT Expert**

May 2017 – Nov 2018 · Bishkek, KG

- Authored the technical component of the national E-Health program for the Kyrgyzstan Healthcare Strategy through 2030, running a deep analysis of health-sector IT gaps and advising the government as an IT expert on digital health direction.

Kyrgyz Investment & Credit Bank **System Administrator**

Jun 2013 – Feb 2017 · Bishkek, KG

- Administered **50+** Unix/Windows VMs and Oracle/MySQL/PostgreSQL/Redis databases in a regulated banking environment, supported **800+** employees, managed firewalls and routing, ran Veeam Backup & Recovery, and provisioned VMs and environments for developers.
